Project Name	F1 Racing Analytics
Maximum Marks	1 Mark

Scalability & Future Plan:
This plan identifies likely limitations of a Tableau Public dashboard and suggests future improvements. These are recommendations for future work, not claims that the upgrades have already been implemented.

Current System Limitations

S.No	Limitation	Impact	Priority to Address
1	Embedded Tableau views depend on external hosting and network access.	Slow or unavailable views can interrupt a live demonstration.	High
2	The dashboard contains several views and needs scrolling.	Small screens may make labels and charts harder to read.	Medium
3	No automated refresh or formal performance benchmark is documented.	New data and load-time behaviour may need manual checking.	Medium

Scalability Plan

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Published Tableau Public views; concurrent usage not measured.	Use responsive page layout; monitor embed reliability and consider an appropriate hosted analytics option if usage grows.
2	Data Storage	Analysis currently uses the supplied F1 dataset and Tableau data source.	Document the source and refresh process; use a managed database or curated extracts if the dataset grows.
3	Performance	Interactive views are externally embedded; no timing results supplied.	Measure load times, reduce unnecessary view complexity and test with browser cache/network variations.
4	Security	Public dashboard and public GitHub repository are intended for sharing.	Do not include credentials or private data; review repository contents and use least-privilege access for any future services.

Future Roadmap

Phase	Planned Feature / Enhancement	Target Timeline	Expected Impact
Phase 1	Validate all Tableau filters and embed loading.	Before final demo	More reliable presentation.
Phase 2	Improve responsive layout and chart explanations.	Next iteration	Better readability on laptops and phones.
Phase 3	Document dataset source and refresh workflow.	Future iteration	More repeatable updates.
Phase 4	Explore additional seasons and richer driver/team comparisons.	Long-term	Broader analysis and stronger trend exploration.
